The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 28-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sundram (5,843,497) and see claims 1-10, especially claims 5 and 10; column 3, lines 2-7 and 48-56; column 4, lines 9-11 and 38-47; column 6, lines 36-50 and column 7, line 61.

Sundram is directed to the fat blend of the claims (see various locations pointed out above). The use of the fat blend in margarine is specifically addressed in the claims and in the specification at column 7, line 61. The use of the product to modify HDL and LDL/HDL ratios is also set forth in the specification. The use of a fat blend containing only the fats set forth in claims 34 and 42 is also shown in the prior patent at Table IV and column 14, lines 62-67 and column 15, lines 1-20.

Although there are a series of applications leading up to this application, all of these applications being continuation-in-part applications,

Art Unit: 1761

the last application does not appear to be directed to the same invention that is in the present case because it is directed to a dairy product.
